AWS S3 Event-Driven Automation Using Lambda

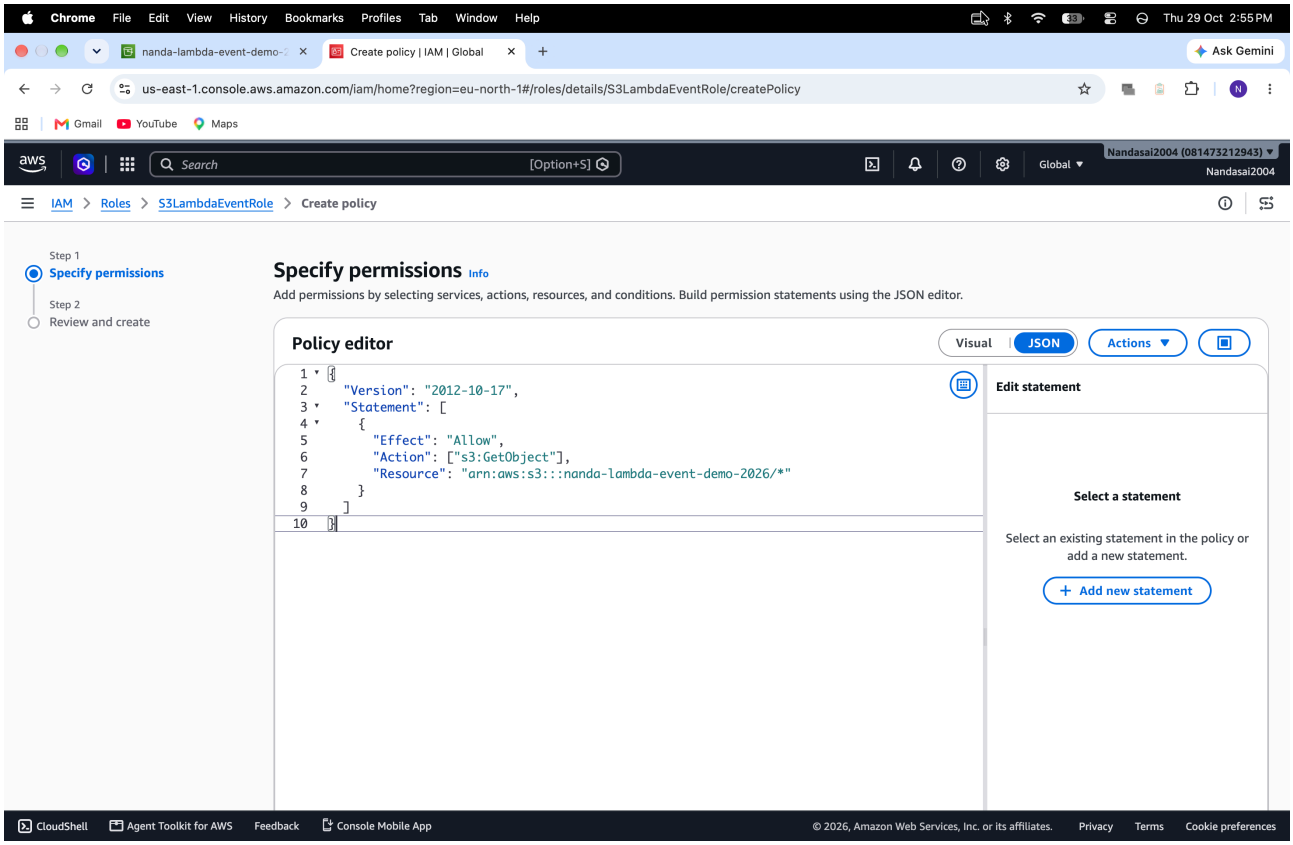

Name : Gorlamandala Nanda Sai
USN : 23BTRCL042
HCLID : HCLTFP2262836

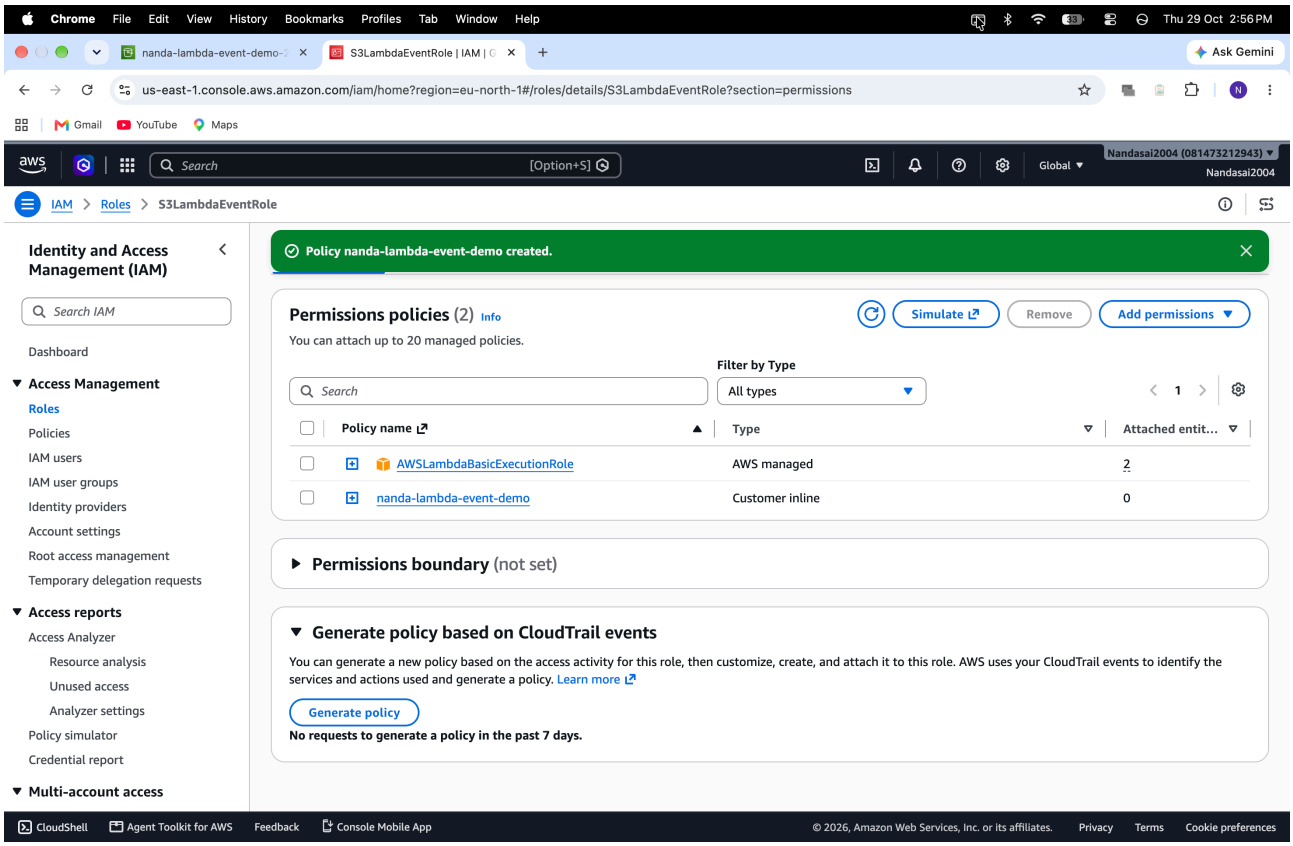

Aim: To automatically trigger an AWS Lambda function whenever a File is uploaded to an Amazon S3 bucket.

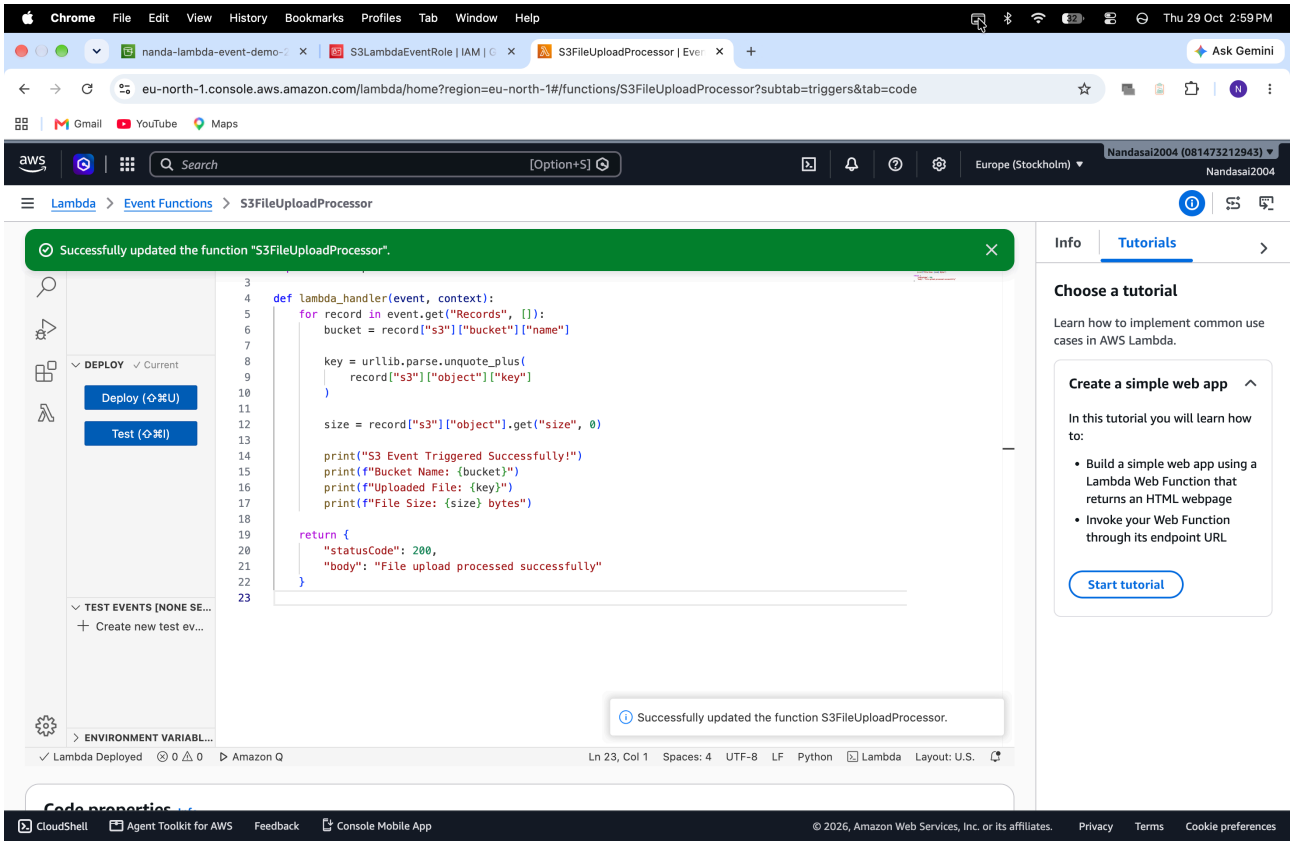

Step 1: Create a new S3 bucket

Step 1
Specify permissions
Step 2
Review and create
Specify permissions Info
Add permissions by selecting services, actions, resources, and conditions. Build permission statements using the JSON editor.
Policy editor
Visual JSON
Actions
{
"Version": "2012-10-17",
"Statement": [
{
"Effect": "Allow",
"Action": ["s3:GetObject"],
"Resource": "arn:aws:s3:::nanda-lambda-event-demo-2026/*"
}
]
}
Edit statement
Select a statement
Select an existing statement in the policy or add a new statement.
Add new statement

Generate policy based on CloudTrail events
You can generate a new policy based on the access activity for this role, then customize, create, and attach it to this role. AWS uses your CloudTrail events to identify the services and actions used and generate a policy. Learn more
Generate policy
No requests to generate a policy in the past 7 days.
